### •Extra

– Passionate learner | Proactive communicator

## PERSONAL PROJECTS

---

### •Frame and Focus (A photography training web application)

[Live Website](#) | [GitHub Client Side](#) | [GitHub Server Side](#)

*Frame and Focus is a learning management website. There are 3 types of user's role here admin, instructor and students. A new user can open an account and select the classes posted by the instructors and then pay using the payment gateway (Stripe). An instructor can add classes by providing some information and after verified by admin the class will be shown in the Classes page. An admin is the custodian of this website. Because only admin verifies everything and can give instructor or student access to any user.*

– Tools & technologies used: React.js, Node.js, MongoDB

### •KidsBay (A multipurpose ecommerce website for kids)

[Live Website](#) | [GitHub Client Side](#) | [GitHub Server Side](#)

*KidsBay is an ecommerce platform where users can order toys for their children. Also, user can sell their products (toys) by adding them into the marketplace.*

– Tools & technologies used: React.js, Node.js, MongoDB

### •Chef's Corner (Chef's & their recipe showcase website)

[Live Website](#) | [GitHub Client Side](#) | [GitHub Server Side](#)

*Chefs Corner is a website that lists the best chefs in Arabian cuisine. Here you can see all the best chefs of Arabian cuisine and you can add them to my favorites if you want.*
